The value of building permits issued in Alberta during January 1972, at \$27 million, was some \$12 million greater than in January 1971. Preliminary February figures show an even greater year to year increase. All categories of permits with the exception of industrial permits recorded substantial increases over the previous year.

A total of 13,600 dwelling units were under construction in the major urban centres in the province at the end of 1971. All centres of 10,000 population and over recorded substantial increases over 1970 in the number of dwelling starts during the year.

Manufacturing output exceeded year earlier levels in January. At \$147 million, the value of Alberta manufacturers output was over 7% higher than twelve months earlier.

Alberta farmers cash receipts totalled \$58 million in January 1972, an increase of 9% over the previous year. Cash receipts for crops were down 15% from January 1971, due mainly to decreased marketings and lower prices for rapeseed. In the livestock sector cash receipts from livestock and products were 28% greater than for the same period last year due mainly to a higher volume of cattle sales.

Year end figures show production of crude oil in Alberta totalled 416 million barrels during 1971, an average of 1,140,000 barrels per day. Of this total, sales in Canada accounted for 184 million barrels or 44%, and sales in the United States 232 million barrels or 56%. The wellhead value of crude oil production was \$1.2 billion for the year, an increase of 22% over 1970. The value of natural gas sales rose over 9% during 1971 to \$266 million; sales in Canada accounted for 53% and sales in the United States for 47% of the total. Sales of propane amounted to \$34 million, butane \$19 million, synthetic crude oil \$47 million, and sulphur \$19 million during 1971.

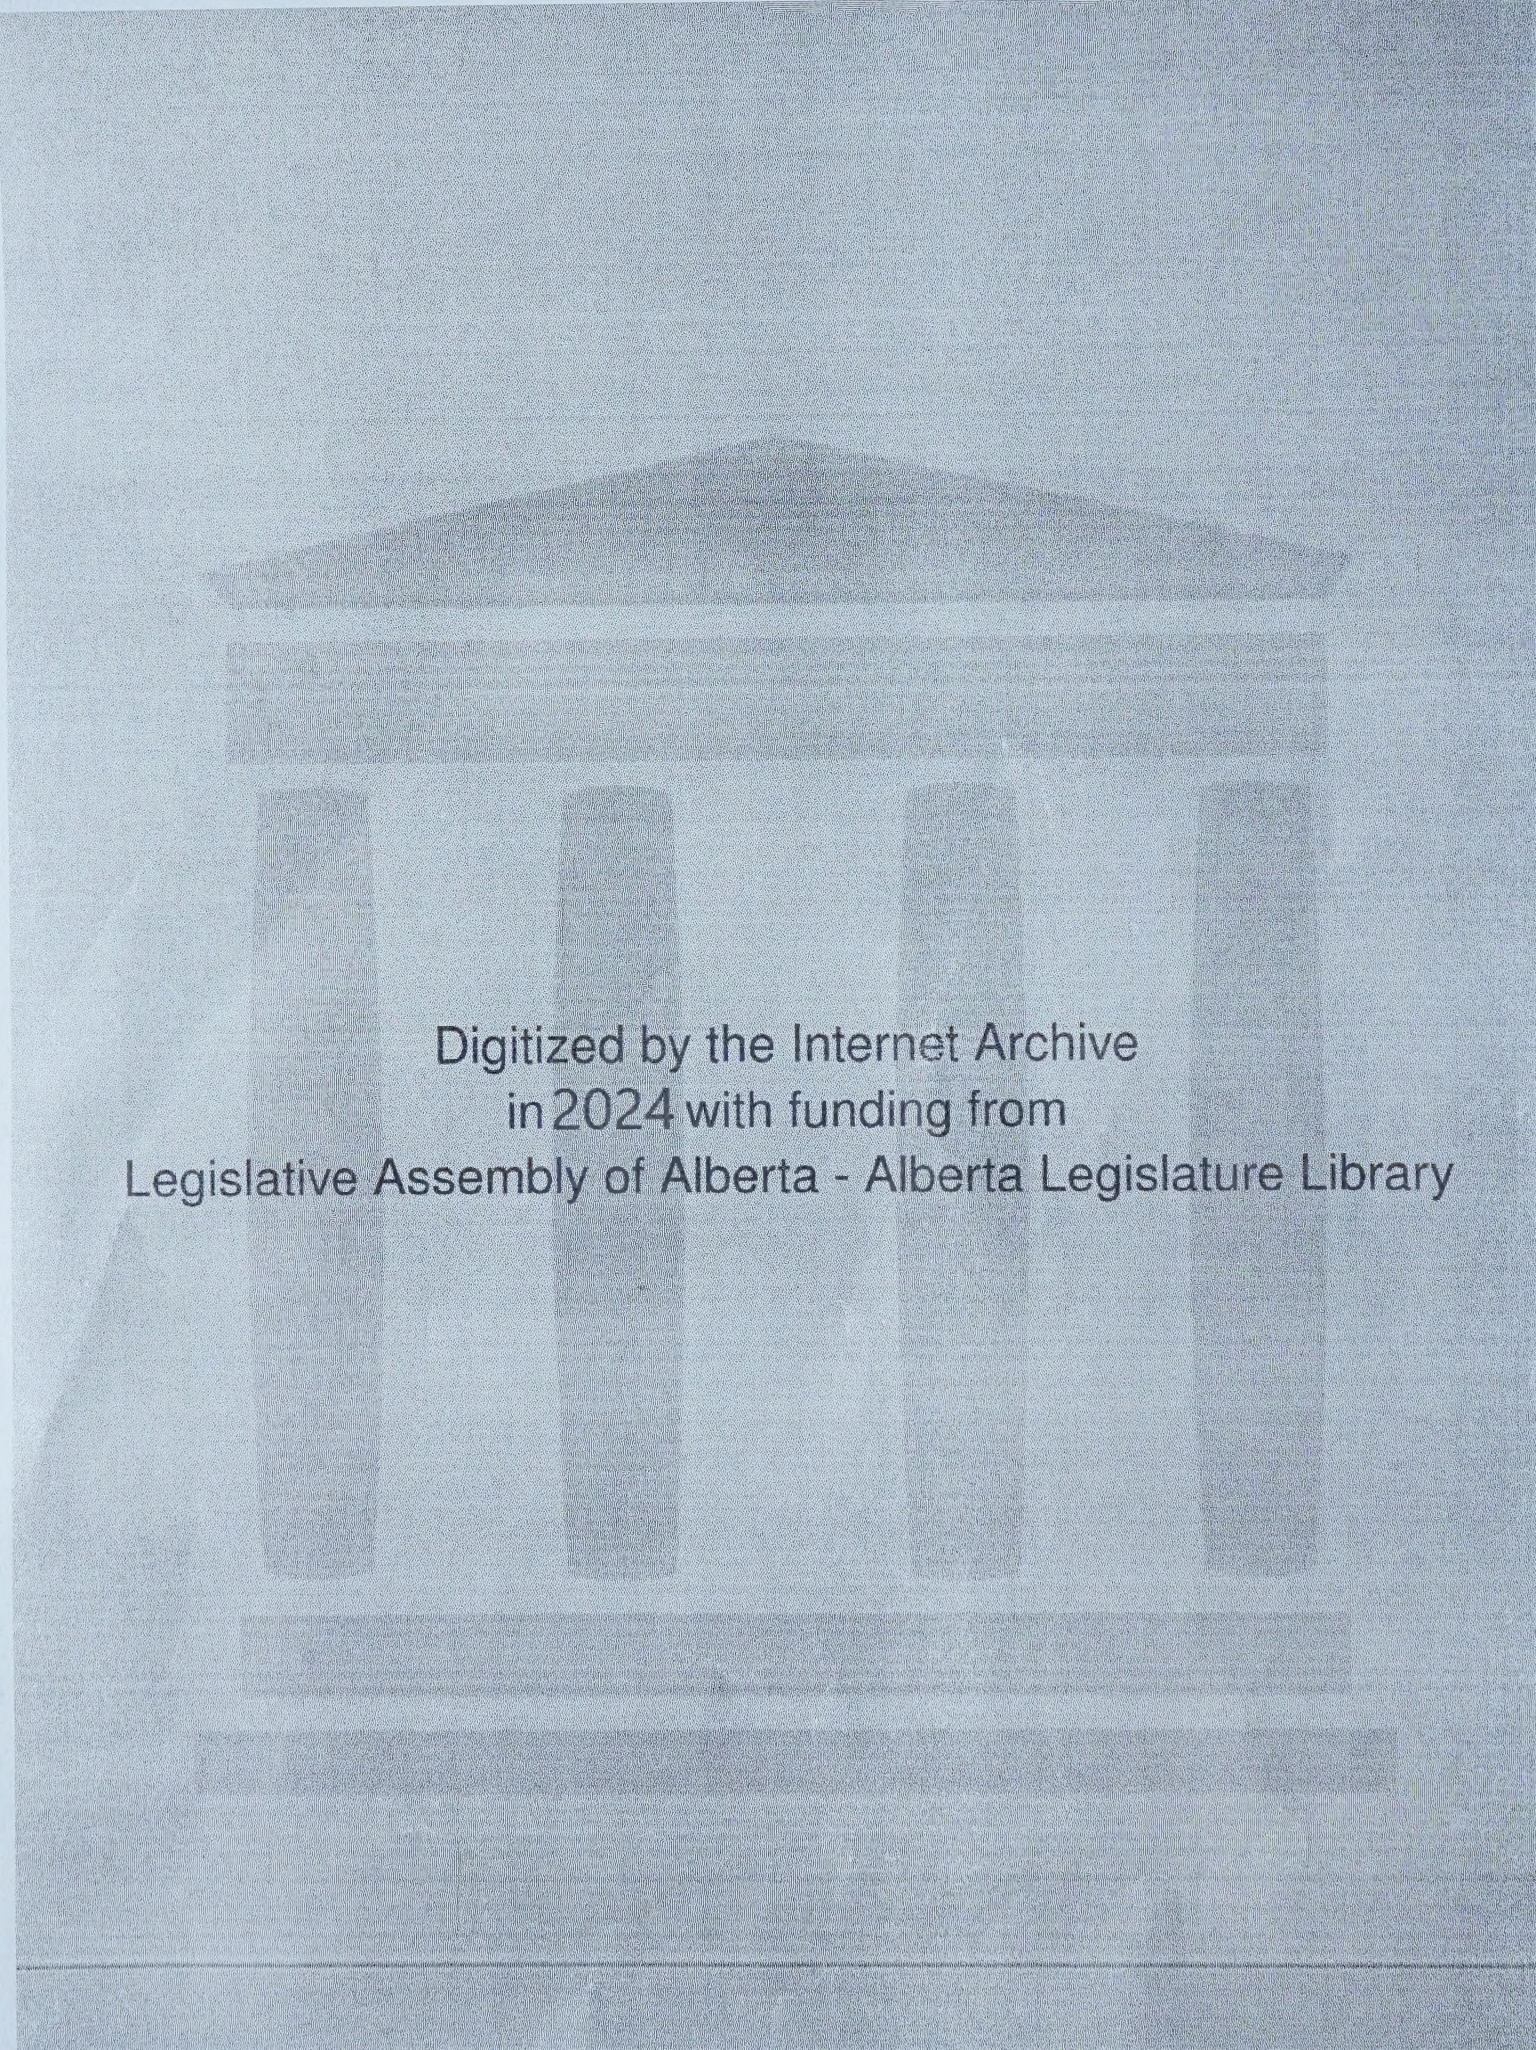

The improved conditions in the major sectors of the provincial economy in 1971 are reflected in retail sales which exceeded \$2.4 billion, an increase of nearly 9% over 1970. Wholesale trade was up 13% over the previous year. Wholesalers in Calgary reported a 20% increase in sales, wholesale trade in Edmonton increased 9% over 1970.

The Edmonton - Calgary consumer price index increased 0.4% between January and February 1972. The February 1972 index was 3.1% above that of February 1971. The main cause of the rise in the latest month was a 0.8% advance in food prices.

There were approximately 33,000 persons unemployed in February out of a provincial labour force of 657,000. The unemployment rate of 5.0% compares to the February 1971 rate of 6.0%.
